PARCHMENT PAPER SHEETS

Our baking paper is made from **FSC-certified raw material**. Baking paper prevents food from sticking and burning onto the baking tray, making it easy to remove baked or cooked food. It also keeps baking trays cleaner, making them easier to wash. The trays do not need to be greased, and the baking paper acts as a thin layer between the food and the tray, resulting in more even baking.

Areas of Use

To prevent baked goods from sticking to the baking tray.

Material

FSC paper with double-sided silicone coating.

Packaging

Loose-packed in dispenser boxes.

Recycling

This product is designed to make recycling easy. After use, sort it as paper. In this way, you help ensure that the material can be reused.
