

POLYCOEX ASBESTOS WASTE SACK

Polycoex waste sack made from multiple layers of 100% reclaimed, recycled LDPE. Extra strong, double-welded sacks with white inside and yellow outside. Specially developed for asbestos waste. The bag has the words “asbestavfall farligt att inandas” printed on it.

Area of use

For asbestos waste

Material

100% re-collected and recycled LDPE in several layers

Packaging

On roll

Recycling

Recycled as soft plastic or incineration. During combustion, only water and carbon dioxide are formed. The energy extracted during the process can be used for e.g. heating.

Recycled Sustainable Choice
