

POLYGREEN DISPOSABLE APRON

Green PE is the name for polyethylene that is made from sugarcane-based material. It has the same properties as ordinary polyethylene and is 100% recyclable, but is therefore made from mainly renewable raw materials. A clearly better environmental choice that contributes to reduced carbon dioxide emissions. We call our products in the polyGREEN series – regardless of color, they are all green in their own way.

Area of use

Used in e.g. a. industry and healthcare

Material

Made of green PE I'm green

Packaging

Packed in a dispenser box

Recycling

Recycled as soft plastic or incineration. During combustion, only water and carbon dioxide are formed. The energy extracted during the process can be used for e.g. heating.

 CE marked

 Food approved

 I'm green Plastic
